**Unmatched versatility,
exceptional throughput**

Heraeus Multifuge 3 Plus Centrifuge Series

Introducing the latest innovation in sample preparation.

From the world leader in serving science comes a breakthrough in tabletop centrifuge performance. The Thermo Scientific Heraeus® Multifuge® 3 Plus Centrifuge Series delivers unprecedented speed and capacity together with the widest range of rotors and adapters available for a premium three-liter centrifuge. Supporting both research and clinical separation needs, our Heraeus Multifuge 3 Plus Series easily accommodates blood collection tubes, conical tubes, flasks, and microtubes, while four ultralight carbon fiber rotors allow you to process more samples more quickly than ever before – freeing you to focus on results.

Push your productivity to the next level with high-capacity accessories

The Heraeus Multifuge 3 Plus Series offers industry-leading capacity and performance for a three-liter tabletop centrifuge. Rotor systems designed to handle up to 108 x 5/7 ml blood collection tubes, 28 x 50 ml conical tubes, or 6 x 250 ml bottles in a single run allow you to achieve greater levels of productivity.

New carbon fiber rotors from FIBERLite® provide an advanced alternative to traditional metal rotors. Lightweight and easy to handle, these rotors generate less wear on the centrifuge motor and are resistant to corrosion, fatigue, and repeated autoclaving.

Fast-track sample throughput with unmatched versatility

Nine swinging-bucket rotor configurations and seven fixed-angle rotors give the Heraeus Multifuge 3 Plus Series unmatched versatility, making it a cost-effective investment for any lab.

Modular, ergonomic design

The Heraeus Multifuge 3 Plus Series is designed with a low deck height for easy loading and unloading of samples. The unique soft-touch lid effortlessly clicks into place for worry-free centrifugation.

Enhanced user and sample safety

The Heraeus Multifuge 3 Plus Series includes numerous safety features to protect you and your samples.

- The SMARTspin® imbalance detection system allows for eye balancing of samples, with automatic termination of a run if excessive imbalance occurs.
- Automatic rotor recognition ensures precise rotor performance while preventing the use of incorrect rotors or parameters.

User-friendly operation

The EASYset™ soft-touch keypad allows for one-touch control of speed, programming, and precooling functions. A bright, easy-to-read LED display allows easy monitoring from across the lab.

Exceptional reliability

The brushless induction drive system guarantees years of dependable performance with minimal maintenance, along with whisper-quiet operation and powerful acceleration and braking.

Process more samples in less time

- Cut processing times in half and double your throughput with high-capacity carbon fiber rotors
- Spin up to 14 x 50 ml conical tubes in a single run
- Achieve super-speed performance with RCFs up to 24,000 x g on the benchtop
- Safely perform high-RCF, single-step separations using sterile, disposable conical tubes

A History of Performance and Reliability

For more than 50 years, our Thermo Scientific Heraeus centrifuges have stood for outstanding performance and reliability in the lab. That tradition continues today. From basic benchtop instruments to advanced floor models, we take pride in manufacturing centrifuges that deliver reliable operation and consistent results year after year.

Worldwide Service and Support

We are committed to keeping your lab equipment working at peak performance levels. Our goal is to help you lower ownership costs, manage labs more effectively, and increase productivity. Contact your local account representative to learn more about our service offerings, including service agreements, preventive maintenance, on-site field repair, depot repair, compliance services and educational services.
